MEN WANTED.

Edmonton's infantry regiment, the 104th Fusiliers, is in a somewhat unique situation. The regiment was organized last year, was recruited up to strength, made a regular corps, after a short period of drill. From so good a beginning it was to be expected that the corps would this year be in excellent condition. It turns out however that during the intervening year, many of the men have left the city, some for homes, steeds and some for other towns. A few officers and men have found it necessary to withdraw for private reasons. As a result the regiment is depleted and stands but half its normal strength. There are needed in fact to bring it up to standard, about 200 men. As the season for outdoor drill and manoeuvres is opening it is desirable that the ranks be filled as early as possible. In view of the fact that a trip to Calais or elsewhere may be arranged later in the season as an outing for the men provided of course an outing for the men recruited up to strength early next month will be far advanced. Edmonton is a city of young men and of men whose loyalty is not a matter of speculation or doubt. Population considered it probably won't move until the Second World War and other Canadian town. The sentiment of loyalty is not of course so descriptive in time of peace as in time of war, but from the many times larger Edmonton of today should be possible to recruit a regiment which in physique, character and intellect to the young man a term of service in a militia regiment should be rather an attractive proposal. True, there is no pay in it. But on the other hand, it makes a man work his working time, drill being done also together in the evening. And the instruction and training given the recruit is such as to be beneficial and useful. So, any man who has his calling. Membership in a regiment too puts one on a footing of acquaintanceship and comradeship with a large number of men of his community. Back of this of course lies the essential factor—the patriotic reason for its existence. I often even young man the chance to show how to help defend his country should defend by arms become necessary in his day, and enrolls him among the forces ready to meet the emergency. Membership in a regiment is not necessarily to a young man physically and socially, as well as a matter of some patriotic pride. For that reason the ranks of the 104th should be quickly filled.

THE MOVING SPECTACLE.

Incredibly, anything in reason that the city can do to help the regiment along should be done. It brings distinction to any city to be known as the home of a well disciplined military unit. It certainly would not be a bad idea. Edmonton known as a city where an infantry regiment could not be kept alive.

THE OFFENDING OATH.

Following is the oath upon which to swear before taking into service. The act of swearing of 1000 requires that each British sovereign shall re-cite the oath either at coronation or on first meeting Parliament:

A CORRECTION.

"I, A. B. by the grace of God, King of Great Britain, Ireland, & of Norway, Defender of the Faith, do solemnly and sincerely in the presence of God, protest, testify, and declare, that I do believe in the Sacrament of the Lord's Supper there is not any transubstantiation of the elements, but only an union of the body and blood of Christ, at or after consecration made by any person, and that I do inwardly receive of the Virgin Mary or any other saint, and the sacrifices of the mass as now used in the Romish Church, & do abominate and detest them. Wherefore the member is a supporter or an opponent of the government is not to be measured by this oath, but it is necessary to have a representative of the electors of the realm that they may have a voice in the government."

SHOULD BE REPRESENTED.

Lethbridge Herald—Medieval is an unrepresented district, and should have a member in the House to look after its interests when the legislature meets. The member is a supporter or an opponent of the government is not to be measured by this oath, but it is necessary to have a representative of the electors of the realm that they may have a voice in the government."

EDMONTON DAILY BULLETIN, TUESDAY, MAY 17, 1910.

EDMONTON DAILY BULLETIN, TUESDAY, MAY 17, 1910.

English Protestants, without any elevation or exequation or mental reservation whatsoever, and without any purpose by the pope or any other authority or man whatsoever, and from any hope or authority whatever, or otherwise thinking that I am or can be so accounted, do declare, and make or affirm, of this declaration or any part thereof, although the pope or any other person or persons or persons whatever, shall protest or declare with or among the same or declare that it was null and void from the beginning.

IN LIGHTER VEIN.

Denver Post—Guitarist Ultugli has a little daughter who hasn't been well recently. The other day a physician was called to the house to see what was the matter. The child was seated in a chair with a stethoscope. When her father came home that evening he asked what was the trouble.

"Nothing," replied the little girl.

"What did he say?" asked Mr. Ultugli.

"He just telephoned me all over, was the child's reply.

Chicago Tribune—Mrs. Chugwater-Jestis, what is an astrophysicist? An astronomer who studies a man's life, writes as he thinks it ought to be. Couldn't you tell from word itself?

Washington Star—Come, wife, cried the old timer, get out of old, and buckle on my coat arm!

With a sigh she obeyed. But twist her teeth she said.

Some day this armor will come! Some day this armor will go! Some day we will have dresses that hood up the back.

Preston Courier—First Child
Woman gets a new baby at our house.
Second Child (contemporaneously)—We've got a new pair at ours.

Illustrated Bits—Arry—Wot's yer 'urf, Bill?

"Arry—Work? Why, wot's the matter with the missis? Ain't she well?

Louisville Courier—Journal—How old are you, little girl?

Six.

And how is it you are out walking without your mamma?

Oh, mamma doesn't go in for exercise. Really, we have very little in common.

Harpers Bazaar—Gladys, well, what did Miss Doctor Cleverton say was the cause of your extreme paleness?

Gracious! She has prescribed for me a hat and waist that will go beautifully with it.

Youth Companion—They were examining an old-fashioned shotgun of monstrous bore and terrible weight. It had no effect on weapons against anything short of an elephant, and its owner was boasting with the greatest of pride when he allowed the successful hunter of its power.

"Don't kick like anything!" said he.

Oh, yes, it kicks some, said the proprietor, but that's the beauty of it. "It's not that the beauty of it, but the kick is what makes it good," was charging me. I misheard him, and on the instant I realized that he had not been that on the kitchen floor, but had had time to reload I shouldn't have been born yet.

Boston Transcript—Wifey—This padding is a sample of the new coat's width, what do you think of it?

"Hoh!—I call it a whale."

Wife—No, dear; it's a tapica.

WITH THE FARMERS

CENSUS BULLETIN OF CROPS
AND LIVE STOCK.

Ottawa, May 15—The census and statistic office has issued its May bulletin on the condition of crops and live stock for Canada.

The report shows that good progress had been made with spring seeding in Ontario, Quebec, Manitoba, Saskatchewan and Alberta, while in the Maritime provinces little more than a beginning had been made. The report also indicates that the manufacture of explosives, but notably need be exposed except the procedure of any large commercial concern, the responsibility for which rests with the managing director, who is responsible to his board of directors. According to the report, the managing director, in turn, is responsible to the city council, which now require is a managing director who shall carry out the policy of that board.

HULL DISASTER: A WARNING.

Toronto Globe—The check of a provisioned soldier, feeling of indomeration over the needless exposure of many people to a continuous danger.

Large numbers of cattle and horses were in the vicinity of the factory removed, but in the report it is stated that the sacrifice of many lives has been made in the interest of safety and the appreciation of the danger involved in permitting the storing of explosive material near residential areas.

It is evident that much has been done to remove the necessary hazard will be forthcoming and such incidents as this will be impossible in future.

THE MOVING SPECTACLE.

St. John Standard—Customs does not share Colonel Roosevelt's indifference.

He is no less spectacular at the court in Norway than he was in America.

Afghanistan—Surprising numbers of the world's most remarkable beasts in surprising numbers. At Cairo he declined his first declaiming to make terms with the Pope, and then at odds with the Pope, and then at odds with the Pope again.

Before the tomb of Napoleon and the pyramids he girded himself with the sword of Kossuth. Belgium learned from him of the Flemish virtues.

Hannibal—The King of Persia girded

himself with the sword of Kossuth.

He was a great year for Roosevelt.

A CORRECTION.

Lethbridge Herald—Medieval is an unrepresented district, and should have a member in the House to look after its interests when the legislature meets.

The member is a supporter or an opponent of the government is not to be measured by this oath, but it is necessary to have a representative of the electors of the realm that they may have a voice in the government."

THE EXPOSURE OF A MEDIUM'S TRICKS

How Eusapia Pallading Fooled People for Years—Caught in New York—Four Scores of Other Countries Universally Protected—Watched Her From Every Conceivable Angle.

New York, May 16.—Dickinson S. Miller, professor of philosophy at Columbia University, has written the following account of investigations which he and a number of other professors made into the weird mystery of the Italian medium, the famous Italian medium:

"The fullest publicity should be given to the results of our studies, for the committee of American men of science in the case of Eusapia Palladio."

The subtle Italian medium has been studied in a kind of international spirit. Her art is to obtain credence under false pretences. She has been studied by Professors H. H. Holmes and others have hardly realized the serious interest that she has sustained for sixteen years. Our own government have not yet given her the results. Impartial committees have issued favorable reports in her favor. No one has ever been so absorbed so much and so prolonged scientific attention. These learned persons have reflected her prices, reputation and excited her prices.

Would Deserve If She Could.

The case stood in January last and no one had any information regarding it since 1895. It was then proved in Cambridge, England (what had been reported before) that Eusapia was a complete deceiver. The holders if she could, free a hand of hers and get into the table behind her. This was once more confirmed by Mr. Edgar T. Scott, Professor of Psychology, Mr. Curtis, psychologist, who took her hand under the curtain into the cabinet and said she was not able to move. He said there was reason to believe that the medium had her left hand tied behind her back so that manipulation was such as her left hand could procure.

Eusapia.

"Then the breeze. Through all the foreign accounts these terrible breezes blow. Cold air under the curtains, etc., and, chief of all, the famous breeze from a scar above the head. She was often striking with her hand, and, when she was struck, she was more noticed to carry with her. No matter how secret this was, there was reason to believe that the medium had her left hand tied behind her back so that manipulation was such as her left hand could procure.

Breeze.

"Then the breeze. Through all the foreign accounts these terrible breezes blow. Cold air under the curtains, etc., and, chief of all, the famous breeze from a scar above the head. She was often striking with her hand, and, when she was struck, she was more noticed to carry with her. No matter how secret this was, there was reason to believe that the medium had her left hand tied behind her back so that manipulation was such as her left hand could procure.

gators belong to Columbia University. Palladio was watched from a tiny window opened in the panels of the door and from a hole in the door and near her chair; from a large drawer on her right; from a hole cut and from a hole in the top of the "cabinet"; an investigation lying across the floor; from a secret instrument case, also kept his eyes at the hole, awaiting the appearance of her hands. Finally, she was watched from the space under the chair on the floor, and from the floor, the watchers having their eyes within about eight inches of her feet.

"First of all, we made close observations of trick. I found her fingers crooked when I discovered that this old ruse we still her, grant straight, when she was producing rays or trade are hidden in reply.

Raising the Table.

"The most baffling of all her wonder was the raising of the table. This table tilted first toward one side, then perhaps toward the other. These first tilts are plain produced by the hands. Then suddenly the end of the table toward the middle rises; then the middle rises at the same time, the table remain on the floor; then perhaps the feet come off the floor; then the table is raised again. The observers saw the movement of the feet, which suddenly appeared in the air, and the table was raised plausibly. Again it was crooked.

These spiritual numbers, members, shrewd about the table, were the secret.

SECRET OF THE WIRD HANDS.

"We found the secret of her 'magical' power. She was a good reporter, weird hands heads and feet, which suddenly appeared in the air, and the table was raised plausibly. Again it was crooked.

SECRET OF THE WIRD HANDS.

"We found the secret of her 'magical' power. She was a good reporter, weird hands heads and feet, which suddenly appeared in the air, and the table was raised plausibly. Again it was crooked.

by the medium's hand, usually the left, and also by her feet, which she can raise to more than a moderate height, and then drop them to her body. I have seen her touch and grasp, and put on and take off her dress, and do a variety of other things, all with her feet. Finally, she was watched from the space under the chair on the floor, and from the floor, the watchers having their eyes within about eight inches of her feet.

"We next come to the rays. The medium, early in the sitting, will tap or thump three times on the table, and then, with a sudden effort, rise out of her chair; she will then stand up, and from a hole in the top of the 'cabinet' an investigation lying across the floor, also kept his eyes at the hole, awaiting the appearance of her hands. Finally, she was watched from the space under the chair on the floor, and from the floor, the watchers having their eyes within about eight inches of her feet.

"First of all, we made close observations of trick. I found her fingers crooked when I discovered that this old ruse we still her, grant straight, when she was producing rays or trade are hidden in reply.

FUTURE OF THE FLYING MACHINE

Army of Inventors Trying to Make
An Actual Vehicle of Practical Use—
New York Herald Discusses Possibilities of Success in Inventions.

What about the future of the flying machine?

Will human ingenuity take up the problem where the Wright brothers have left off? Will there be a king of permanent motor and a king of gas buoyancy and sustaining plane will never prove a serviceable plane? Charles J. Lake, builder of submarine boats, is now being demmed with great speed.

One year ago comparatively few inventors were interested in the Wright idea. Today that is the one problem that goes far away from the Wright patent," they are saying.

Now there are inventors who are

working on the vertical reader,

the Wright brothers, those aerodromes

that are not up to the mark.

What about the future of the human flight?

They are far more pessimistic than the Wright inventors. They say that the flying machine has no future as a human carrier. They do not believe that it will ever be used in common carrier of any value.

The present type of machine may say when it comes into existence that it will make many improvements themselves.

But fundamentally they tell you the man will not be able to fly anything beyond what we now have. It will not revolutionize the system of transportation, they declare, and will be used only in sports, warfare and for certain kinds of work.

At present there are many eminent scientists and inventors who believe

that man will be able to fly

anything beyond what we now have. It will not revolutionize the system of transportation, they declare, and will be used only in sports, warfare and for certain kinds of work.

AROUND THE CITY

LOCAL

The May sitting of the Supreme Court of the province was adjourned to day for the trial of criminal cases and jury civil cases, had been postponed until Wednesday evening, but owing to the death of His late Majesty King Edward VII.

Mr. and Mrs. George McManus are visiting the parents of Mr. McManus in the city for a few days.

G.T.P. TICKET AGENT HERE.

R. C. W. Lett, travelling passenger and colonization agent of the Grand Trunk Pacific Railway, arrived in the city from Winnipeg this morning and proceeded west to Wolf Point, Mont., where he will remain until Saturday, the 20th instant.

Mr. Lett spent his time in the city completing arrangements for the Grand Trunk Pacific's new line of travel to the West Coast, which will be opened to traffic in July.

Three Detroit Attorneys of Law, J. S. Crandall, G. H. Crandall and R. C. L. Morris, members of the Edmonton Board of Trade this morning to make inquiries regarding land purchases in the city.

Three attorneys representing a party of Detroit people who are coming to Alberta to purchase land, have purchased two sections of land near Beaver Lake in the vicinity of Tofield.

They expect to buy more land, that they have determined to take up land for themselves and start farming. They expect to remain in Alberta, settle in the Edmonton district, after returning to Detroit to settle up their affairs in that city.

MASONIC NOTICE.

A special joint emergent meeting of Edmonton's Masonic Lodges and Union Lodge, F. & A. M., Second Street on Friday evening, May 20th, at which the Masonic services of attending the memorial services to be held in the Empire Theatre, All Masons are requested to attend.

IN THE SUPREME COURT.

Philip Scotts of Spokane has filed a writ of habeas corpus in the Supreme court, in the Supreme court, claiming that the defendant Butler, by his attorney, had been unlawfully detained from him for a date April 29th, 1910, to \$1,000.00, and that he was unlawfully detained by the plaintiff. The plaintiff claims an injunction restraining the defendant from serving the writ, with the note, Boyle and Parise are soldiers of the plaintiff.

UNITED AIDS.

The United AIDS have issued the report for the half-year ending with April 30th. The financial statement shows the results and distribution of funds have been: Income—Grants from the city council, \$1,200; donations and collections (including the work of Mrs. Tracy Barker and Mrs. Page), \$319.30; juvenile activities, \$100.00; contributions from funds on tickets, \$118.50; funds from the sale of life insurance, \$138.80; gift in groceries in kind, \$100.00; funds from relatives of deceased for funerals, \$67; old age pension, \$2,737.75; \$287.15; Exchange, \$100; office, \$75; salary, \$380; furniture and fixtures, \$300.22; printing, books and advertising, \$100; rent, \$100; coal, medicine and beds, \$80.34; telephone and light, \$26.40; funeral, \$100; medical expenses, \$100; visiting officer, \$15; car fare, 75c; incidentals, \$100; bank charges, \$50; on hand, \$56.75; total, \$2,075.15.

HOLDEN AGAIN REMANDED.

After Holden, who pleaded guilty on Saturday morning to a charge of stealing \$225 from a registered letter, which he received from the Stratford post office, was brought up on sentence in the District Court, Mr. Justice G. W. Martindale, manager of the Stratford branch of the Canadian Bank of Commerce, in which Holden was employed, was read by Crown Attorney C. J. Robert, that Mr. Martindale wrote to the Commissioner of Police to demand the immediate release of Holden, and it had been made by the counsel for the accused in stating that Holden had received \$225 from the bank, and no other means of support. He was receiving a sum from the bank a salary of \$500 a month, and \$250 a month for expenses in addition to free room, light and washing. It was not the case that he had paid up, and had been released, as had been stated. He still owed some \$30 in previous debts, and the amount of money he had registered in his bank account, he had stolen two savings bank deposits for him.

A deposit by Holden in Winnipeg was also read. The prisoner, the court statement declared, had not had any influence under the influence of drink. He had been drinking for some time. The trial was terminated by His Honour Judge Taylor decided to remand for sentence.

THE WEATHER.

A few scattered showers have occurred, but generally the weather in the Prairie Province is fair. In Manitoba it is cool and wet.

Forreston had the usual westerly winds, some local showers; mostly fair, and warm today and Wednesday.

The weather continues to improve in the different centres, follows:

Kamloops 76 54
Edmonton 76 54
Red Deer, clear 76 54
Calgary, fair 76 54
Lethbridge, clear 76 54
Medicine Hat, cloudy 76 54
Saskatoon, clear 65 44
Yates, clear 65 44
Swift Current, clear 64 44
Regina, clear 56 39
Bisbee, clear 56 39
Hamite, fair 56 39
Minnedosa, cloudy 56 39
Winnipeg, clear 49 33
Portage la Prairie, clear 49 33
Winnipeg, clear 42 28
Carman, clear 50 30
Port Arthur, cloudy 50 40

PERSONAL.

Mrs. G. Campbell will receive tomorrow Wednesday, May 18th, her first child since the birth of her son, Eddie.

Mrs. Emma Marshall, 45 Clark street, will not receive on Wednesday, May 18th.

Mrs. A. and 790 Sixth street, will receive on Wednesday, the 18th, for the last time this season.

Mr. and Mrs. George McManus are visiting the parents of Mr. McManus in the city for a few days.

G.T.P. TICKET AGENT HERE.

R. C. W. Lett, travelling passenger and colonization agent of the Grand Trunk Pacific Railway, arrived in the city from Winnipeg this morning and proceeded west to Wolf Point, Mont., where he will remain until Saturday, the 20th instant.

Mr. Lett spent his time in the city completing arrangements for the Grand Trunk Pacific's new line of travel to the West Coast, which will be opened to traffic in July.

Three Detroit Attorneys of Law, J. S. Crandall, G. H. Crandall and R. C. L. Morris, members of the Edmonton Board of Trade this morning to make inquiries regarding land purchases in the city.

PROVINCIAL BREEDERS' ASSOC.

Edmonton Exhibition Association, with a view to encouraging the participation of the provinces in the exhibition, has incorporated four Provincial Breeders' Associations.

The Alberta Horse Breeders' Association Limited, the Alberta Cattle Breeders' Association Limited and the Alberta Swine Breeders' Association Limited.

These associations have headquarters in the offices occupied by the Edmonton Agricultural Association and any inquiries regarding the same should be directed by the Secretary. It is understood that the management of the exhibition interests will be left entirely to the Secretary. It is understood that the management of the exhibition interests will be left entirely to the Secretary.

What did you do first? asked Mr. Clarke later.

Some time during the year 1908, I was then president of the Alberta Agricultural Society and I had information about the north country.

My first banking transaction was to withdraw my cash from the Bank of Canada.

"Did you learn anything from Clarke as to your proposed business?"

He said he was contemplating the building of a railway to the north.

What did you do next? asked Mr. Clarke personally?

I went to the City banks about his financial standing and they informed me that he was all right. I also saw at that time that he had a draft on the Bank of Canada.

What was he to be used for?"

"Nothing further than that, it was just a general inquiry in connection with the railway."
